Abstract (en)

[origin: EP0381820A2] The invention relates to an espagnolette lock with espagnolettes displaceable in the opening direction counter to a spring effect as a result of the actuation of a handle. In order, in the opening position of the espagnolette lock, to keep at least one (24) of the espagnolettes (23, 24) in the opening position controlled from inside the lock, without the use of an additional lock, according to the invention the espagnolette is engaged in the abovementioned position and this engagement position can be released by means of the closing actuation stroke of the lock. <IMAGE>
