Abstract (en)

The present invention provides, in a process for chrome tanning hide, a method for imparting hide with waterproofness, which is a method for waterproofing treatment of leather which is characterized by that in a greasing step falling in the last step of the chrome tanning process, hide after dyeing treatment is subjected to drumming with a treating solution containing two greasing agents having a hydrophobic effect and one waterproofing agent for a required time thereby imparting said hide with oily feel and waterproofness, and thereafter is subjected to re-chrome tanning and subsequently to water-repellent treatment.
