Abstract (en)

[origin: EP0692851A1] The electrical connection device includes an isolating body (10) which has a number of axial holders (11) and isolating sections for individual connections. The upper and lower ends of each section have protruding shoulders (32). U-shaped conductors are placed in position in the central position and a two section tong section (25,27) is placed over the shoulder. The tongs have two outer wings and a central rounded section for the conductor. The tongs have an inner and outer section to provide springing. <IMAGE>
