Abstract (en)

[origin: EP0836820A2] The neck cushion (3) is provided to the back rest at the height if the user, with its rear wall (4) locating against the front wall (5) of the back rest cushion (2). The front wall of the back rest cushion has two slots that run vertically relative to the furniture and are spaced apart in a horizontal direction, in which is sewn a through zip fastener (7). The zip fasteners have two counter-running zip fastener slides (8,9), the lower (8) of which opens in a vertical operating direction downwards towards the tip closure and the upper (9) closes in a vertical operating direction downwards towards the zip fastener, and vice versa. A total number of four zip fastener slides is provided to the cushion rear wall.
