Abstract (en)
[origin: EP0733751A1] The jointing plate (2) has at least one opening (3) larger than the cross-section of the projection (6) which fits in it. A sleeve (4) is set in the opening adjoining the plate. The sleeve has an opening (5) for the projection. The size of this opening corresponds to the cross-section of the projection. The sleeve is made of fire-resistive material. The sleeve is stuck or welded onto the joining plate or can be formed integral therewith. The jointing plate can be made of soft plastics foam.
