Abstract (en)

[origin: WO9718129A1] The invention relates to a method for the packaging of mixtures of substances, in particular washing and cleaning agents, of at least 50 g of a powdery and/or granulated mixture, containing 10 to 95 % by weight of an alkaline substance and 0.2 to 30 % by weight of an oxidisable organic substance. The mixture of substances has an average particle diameter ranging from 0.1 to 2.5 mm, and gas-tight bags are filled with said mixture to between 70 and 95 % by volume, and subsequently stored to be quasi-adiabatic, thereby causing the effect of the vacuum packaging.
