Abstract (en)

[origin: WO9748154A1] A device for crimping a series of metal lugs on electric wires with an insulating sheath of which one end has been partially stripped off, wherein each crimping block (6) is secured to a plate (1) by releasable attachment means (26, 27); and each crimping die (8) is secured to the tool holder (2) by releasable attachment means (18), said releasable attachment means (18, 26, 27) being suitable for attaching one or more blocks (6) and matrices (8) having a variety of shapes and/or sizes. A tool assembly (21) for use with such a crimping device is also disclosed.
