Abstract (en)
[origin: EP0935359A2] The receiver contains a receiver unit (2), an output unit (4), a control unit (6), an analysis unit (8) and a memory (9). The analysis unit analyses programs that have been preselected by the user for common characteristic properties in order to determine the user's listening habits. Only those programs corresp. to the user's listening habits are presented for listening or output. An Independent claim is also included for a method of operating the receiver.
