Abstract (en)

[origin: US4203334A] A process and an apparatus for manufacturing books, blocks or calendars by cutting large sheets having printed thereon different pages into smaller sheets which must be brought into an orderly succession before the pages or sheets are bound. The usual folding of the large sheets can be omitted, in that the sheets are fed individually and successively to a conveyor means and are conveyed towards a cutting means; the individual sheets are stacked in a partially overlapping manner. The cutting of the sheets is effected whenever predetermined widths of the individual sheets have been conveyed through the cutting means.
