Abstract (en)

[origin: WO9838643A1] A mobile or portable playback apparatus, in particular with a MiniDisc or CD player or with a cassette apparatus, is characterised by a radio telephone circuit integrated into the playback apparatus and a speaker microphone for carrying out a telephone conversation. In a headphone cable (9) which creates a connection to headphones or earphones there is provided a dial (16) with at least one operating key (17.1 to 17.3) for the radio telephone circuit. The speaker microphone may then be accommodated in the dial (16) or pivotably carried by the headphones.
