Abstract (en)

The cladding member has an elongated profile (21a) used on building structures with a double or multi-angled cross section including a cladding strip (23a) which projects beyond the edges of the profile. The profile arms enclose an angle of 90 degrees and the cladding strip is permanently attached to the profile by adhesive bonding or welding. The profile is of plastics and the strip is a glass fibre-reinforced mesh strip which projects beyond the profile by a multiple of the maximum extent of the profile cross section.

Abstract (de)

Um komplizierte bauwerkseitige Partien sauber zu verkleiden, wird ein Verkleidungselement vorgeschlagen, mit einem zwei- oder mehrfach gewinkelten Profil (21c), woran sich, überkragend, eine Verkleidungsbahn (23c), als Gewebe- oder Gitterbahn ausgebildet, anschmiegt. <IMAGE>
