Abstract (en)

[origin: WO9850293A1] Refuse holder (container) (1), which is suitable to be placed in a pit (2). The holder comprises a bin (3), a cover (4) which is arranged above the bin (3) and has a central filling opening (16), a hook-on member (14) in the vicinity of the upper peripheral edge (11) of the bin (3), and two arms (20) which are coupled to either side of the bin (3) between the bin (3) and the cover (4). The arms (20) are vertically displaceable with respect to the bin (3), and can rotate about a horizontal axis. The arms (20) have a length which allows the bin (3), when the cover (4) has been lifted above the bin (3), to rotate from a suspended position through at least 90 DEG .
