Abstract (en)

[origin: DE19720741A1] The invention relates to a printing press with an integrated device to print at least one printing form which is arranged on a printing form cylinder. The invention seeks to provide a printing press with an imaging device and an economical sheet slant compensation facility. According to the invention, this is achieved by feeding the sheet (10) to be printed to the printing cylinder (6) in a slanted position corresponding to the slanted position of the printed image (19) on the printing form (3).
