Abstract (en)
The invention concerns a pull-type fastener-setting tool comprising a pulling device (40) arranged to grip a pulling stem of the fastener, the pulling device being movable to pull the pulling stem by means of a rotatable cam (62) turned by a rotatable handle (76). The pulling device (40) having an arm (80) pivoted thereon and carrying a cam follower (84) which bears on the rotatable cam (62) the arm being pivotally connected to a link (90) which guides the cam follower in alignment with the pulling device. The link is also pivotally connected to the housing of the tool within a handle portion thereof.
