Abstract (en)

[origin: DE19804472C1] The invention relates to a linear guide in a cylindrical mount for optical components, comprising a stationary linear guide way (3), an axially displaceable inner variator (4), a rotational external cam support (9) and a transmission member (5) fixed on the variator (4) in-between the variator (4) and the cam support (9). The inventive guide is characterized in that one of the sides of the guide ways (3) has an elastically mounted stop bar (6) serving as running surface for the transmission member (5)
