Abstract (en)

[origin: WO9962642A1] The invention relates to a method for contactless application of liquid media such as liquefied thermoplastic substances or molten hot melt adhesives on a strip of material (22) that moves in relation to the application head using an application head (11), whereby the application head has at least one nozzle hole (18) arranged at a distance from the strip of material for applying the medium. According to said method, the at least one nozzle hole is alternately impinged upon backwards by medium and compressed air.
