Abstract (en)

[origin: EP0000713A1] 1. Apparatus for storing and distributing small elements and/or for spreading material in granule form, more especially salt, sand, fertilisers, seeds or the like, consisting of a container (1, 101) holding the material and having a base constructed as a slide or chute (4, 107) and at least one outlet and/or spreading opening (6, 106) which adjoins the chute (4, 107), which outlet or opening is associated with a specific peripheral zone of the container and beneath which is arranged a spade-like member directed radially outwards at its free end, characterised in that the measuring spade-like member (8, 109) extends horizontally or slopes slightly downwards with respect to the horizontal, that the container (1, 101) is provided with a filling opening and that the upper end of the container (1, 101) has arranged thereon a bowed handle (2, 102), which permits the container to be rotated manually about its vertical axis.
