Abstract (en)

1. Polyaryl-sulphone/polycarbonate mixtures comprising 90% by weight to 60% by weight of a linear polyaryl-sulphone and 10% by weight to 40% by weight of a homopolycarbonate of bis-2-(4-hydroxyphenyl)-propane (bisphenol A) or a copolycarbonate of at least 30 mol % of bisphenol A and up to 70 mol % of other diphenols, the polycarbonate component having a \bar{M}_w (weight-average molecular weight) greater than 60,000.

Abstract (de)

Polyarylsulfon- Polycarbonat- Abmischungen aus 90 Gew.-% bis 60 Gew.-% linearem Polyarylsulfon und 10 Gew.-% bis 40 Gew.-% Polycarbonat mit einem \bar{M}_w (Gewichtsmittelmolekulargewicht) grösser 60.000 und ihre Verwendung zur Herstellung von Extrusionsfolien.
