Abstract (en)
The system has a location device, a data communications device, a computer and a device for automatically evaluating the mission. The location device contains a Global Positioning System or GPS and the data communications device contains a GSM mobile telephone device. The automatic evaluation device contains a device for computing routes using the GPS signal. Independent claims are also included for the following: a method of automatically computing a route using a GPS signal, selecting at least one data element and producing a report using the selected data element and the computed route.

Abstract (de)
Die Erfindung beschreibt ein mobiles Einsatzsystem mit einer Ortungseinrichtung, einer Datenfernübertragungseinrichtung, einer Recheneinrichtung und einer Einrichtung zum automatischen Auswerten des Einsatzes.
