Abstract (en)

[origin: WO0165171A2] The invention relates to a reflector arrangement for a lamp. Said arrangement comprises at least one longish lamp. A longitudinal reflector extends in the longitudinal direction of the lamp and several reflecting transversal lamellae that are spaced apart are provided crosswise in relation to the longitudinal direction of the lamp and are provided with a lowered area on the side facing the lamp(s) and in the centre when seen in the longitudinal direction. The lowered area (5) of the transversal lamella (4) is provided with an essentially even reflecting middle part (6) which is situated in parallel in relation to the outlet (2) of the reflector arrangement.
