Abstract (en)

[origin: EP1348352A2] Cosmetic unit (1) comprises two different applicators (6, 7), each having a handle (4, 5). Each applicator is inserted in a container (2, 3) having a container neck (8, 9) with an external thread (10, 11) on which a coupling part (12, 13) is screwed. The two containers are removably joined together by the coupling parts serving as sealing caps via a coupling sleeve (17). The coupling parts are rotationally fixed to the coupling sleeve by an axial tooth arrangement and are axially fixed to the coupling sleeve by a snap-in connection.
