Abstract (en)

[origin: EP1426697A2] The mounting and connecting device for a radiator has a preferably tubular connecting device which has at least two vertically spaced apart connecting elements of which one (7') is provided for the pipe connecting system (6) and one (7) for the radiator (2). At least the connecting element for the radiator is orientated normally to the mounting wall (13). At least one of the connecting elements is formed as part of a releasable plug-in connection. Independent claims are also included for the following: (a) a radiator for mounting and connecting by the proposed device; and (b) a procedure for the mounting of a radiator using the proposed mounting and connecting device.
