Abstract (en)

The process for improving the rheological properties and the redispersibility of sodium aluminosilicate doughs and powders consists in adding to the dough from 1 to 25% by weight of Na₂SO₄, based on the total solids content after sulphate addition.

Abstract (de)

Das beanspruchte Verfahren zur Verbesserung der rheologischen Eigenschaften und des Redispergiervermögens von Natriumaluminiumsilikatteigen und -pulvern besteht darin, dem Teig 1-25 Gew.% Na₂SO₄ zuzusetzen, bezogen auf den Gesamtfeststoffgehalt nach Sulfat-Zusatz.
