Abstract (en)

[origin: EP1473682A2] A gaming system comprises a server (1) and a client (2). In response to a request from the client (2), the server (1) generates one or more random values to the client (1). The client (2) generates an image giving the impression of the real-time generation of a received random value in response to a user input. The generation of the image is reported back to the server (1).
