Abstract (en)

[origin: EP1609388A1] The device has shoulder straps (26) and a waist belt (28) for supporting load arranged against a user`s back. Two support yokes (34) cover transversely the user shoulders up to a lateral end of the shoulders. A compartment is disposed against the back of the user for receiving the load. The straps present a top end connected to an upper portion of the load carrying compartment.
