Abstract (en)

[origin: WO2005100703A1] The invention relates to an outlet element (1') for a sanitary fitting (17). Said outlet element comprises a connecting part (2) that is detachably fastened on the sanitary fitting (17) on the outlet side, and an outlet part (3). Said outlet part has a liquid outlet (4) forming the fitting outlet. A sanitary functional unit is configured as an insertable cartridge (6) and can be inserted into the liquid outlet (4). The connecting part (2) and the outlet part (3) are interlinked in an articulated or rotating manner. The outlet element (1') is characterized in that the liquid outlet (4) of the outlet part (3), in terms of its internal width, is adapted to the insertable cartridge (6) and in that the insertable cartridge (6) can be inserted into the liquid outlet (4) from the opening side and is detachably held therein.
