Abstract (en)
[origin: EP1782705A1] [Object] It is an object of the present invention is to provide a wear provided with a crotch part, characterized by being furnished with good steady tightness and hard to be worked down, and preventing ventral from being pressed. [Means for Achieving the Object] To the wear comprising a main body cloth including a crotch part that covers at least a part extending from ventral to hip, a first band-like elastic member 4 is attached to a part extending from the upper end of the main body cloth 2 onto hip to the upper ends of the main body cloth at positions 5 respectively locating onto ilium crests in both sides. Then, second band-like elastic members 6 are attached to a part extending from the upper ends of the main body cloth locating at positions 5 onto ilium crests in both sides to positions 8 in the vicinity of the both sides of public through inside the respective positions 7 onto upper foregut bone spurs in both sides such that the distal ends of the elastic members 6 are attached at a preset distance to each other.
