Abstract (en)

[origin: EP1932642A1] Method for connecting wooden parts comprises aligning the contact surfaces (3, 4) in a slanted or perpendicular manner to the fiber of the wooden parts. Preferred Features: The contact surfaces are planar. The wooden parts formed as frame parts (1a, 1b, 1c, 1d) are joined together in pairs so that they form a frame (2) surrounding an opening and lying in a frame plane. The contact surfaces are aligned slanted to the longitudinal direction of each frame part.
