Abstract (en)

[origin: EP2028018A2] The device (1) has a data storage device (2) connected with a support body (7) by a clip (6), and comprising a detachable protective cap (5) for an interface device (4). The protective cap is connected with the clip, and the interface device is arranged relative to the body in a manner such that the interface device is projected by the body during detachment of the cap. The clip consists of a reversible, plastic deformable material, and the interface device is formed according to a type of a Universal serial busconnector and a Fire wireconnector.
