Abstract (en)
[origin: GB2340771A] An apparatus for crushing reinforced concrete elements and separating the crushed concrete from the reinforcements, the apparatus comprising a crusher e.g jaw crusher 4,5, for crushing the reinforced concrete elements into crushed concrete and reinforcements the crusher having outlet 7 for discharging the crushed concrete and the reinforcements along an inclined discharge path and a chute for receiving the discharged reinforcements, the chute being laterally spaced apart from the outlet so that the crushed concrete falls into the gap between the crusher outlet and the chute. The crusher may be a different type having an inclined discharge plate at its outlet.
