Abstract (en)

[origin: EP2644535A1] The element has eyelets (16) allowing passage of a flexible elastic link of the element on a container. A handling eyelet (21) grips the element, and is located in vicinity of corner (C1) of the element. Second and third handling eyelets (22, 23) for gripping the element are provided along longitudinal edge (4) of the element and located at distances (d2, d3) from the first handling eyelet less than 2000 mm, preferably less than 1000 mm. The first handling eyelet is placed on a synthetic fabric tape (25), which extends from the corner and prolongs the edge toward outer side of the element.
