Abstract (en)

[origin: WO9947308A1] A palm driver (10) has a rotatable drive member (35) and an ergonomic handle body (11) connected to the drive member through a ratchet mechanism (37) and covered by a cushioning grip (30). The handle body is asymmetrically curved and is substantially continuously convex along portions engageable in use with the user's hand, having a generally flattened top surface (12) opposite the drive member and receivable in the user's palm and a peripheral side surface (16) which has a plan outline which is continuously convex and has a generally flattened heel portion (17) and an opposed, much smaller radius finger portion (21), respectively engageable with the heel and fingers of the user's hand in use.
