Abstract (en)

[origin: DE19732610A1] The invention relates to a device for protecting or supporting the body. The inventive device can be arranged on one part of the body and comprises a shaped body filling consisting of individual shaped bodies in a receiving envelope (11). The receiving envelope (11) is arranged in an outer section (13) substantially opposite to part of the body and relatively rigid in relation to an inner section (12) substantially facing part of the body.
