Abstract (en)

A bridge-type conveyance system for crossing roads and the like, comprising a box-like structure which is meant to be arranged transversely to a road and to support a plurality of pedestrian-carrying cars (15) traveling along a closed path; the cars (15) are actuated by actuation means which are connected to kinematic means for the movement of the cars (15) in a continuous cycle along the structure of the bridge-type system from one side of the road to the other. <IMAGE>
