Abstract (en)

In a two-part case for small electrical apparatus, in particular electric razors, each comprising a frame having, fitted therein, a dished top and bottom respectively and having depositing troughs for the objects to be accommodated in the case, the depositing troughs (5,6 and 7,8) are directly formed both in the top dish (3) and in the bottom dish (4), in such a way that the convex sides of the depositing troughs (5,6 and 7,8) project outwards beyond the frames (1 and 2, respectively). <IMAGE>
