Abstract (en)
[origin: EP1027848A2] The goods carrier (10) has a plug section (14) for plugging into a goods carrier holder (30); the plug section has at least one connector for transferring electrical signals. The connector (70) has two connector connections (52,72). Two connectors are arranged adjacent to each other in a direction corresponding to the maximum cross-sectional dimension of the plug section. Independent claims are also included for a goods carrier holder and for a goods carrier system.
