Abstract (en)

[origin: WO9718955A1] Automatic marker for books, agendas and the like, appropriate for signalling the last page read/written by the user and comprised of three parts: an indicator segment (1); a fixing element (2) fixed to one of the covers, pages or spine and a union means or flexion arm (3) between said segment (1) and said element (2). Said parts (1, 2, 3) are conformed into a single piece (20), the indicator segment (1) and flexion arm (3) being obtained by a cut/separation through weakening-precut lines of one area of said part (20) with fixing points which are separable when using the marker. The remainder of the part (20) forms the fixing part (2), used as support which is fixed interleaved between the pages of the assembly, one edge bearing on the spine and remains fixed due to the pressure of the pages. It includes a stop (9) for an adequate positioning of its top edge.
