Abstract (en)

The locating device (6) flexibly fits a functional apparatus, such as kitchen scales (17), in a drawer (1) and has telescopable thrust parts (7,8), making possible adjustment to drawers of different width. At least two locating sections (10) are diametrically arranged in the telescoping direction (9) for a locator moable vertically to that direction on the upper free edges (5) of the body side walls of the drawer. The locating sections are flat and have a locating surface (11) formed as a slide surface with low friction resistance. On it is fitted a layer of polytetrafluoroethylene.
