Abstract (en)  
[origin: EP0001765A1] 1. Crimping device with a drive device which acts upon a crimping tool and generates a constant working stroke, characterised thereby, that a toggle lever system (3) is arranged between the drive device and the crimping tool, wherein the one free arm (8) of each toggle lever joint is articulatedly in connection with the drive device and the respective other arm (9) is articulatedly in connection with the crimping tool, an abutment is provided which prevents a straightening of the toggle lever (7) and wherein a yielding force acting in the sense of the pressing-on of the abutment and a longitudinal guide, which assures a guidance of the crimping tool in longitudinal direction of the working stroke, are provided.
