Abstract (en)

[origin: WO2005053968A1] The invention relates to a multilayer security element comprising a metal layer (20) into which marks (16) are introduced in the form of patterns, letters, numbers, and/or images by means of a laser beam. Said metal layer (20) is disposed between two translucent coatings (26, 28). The marks (16) in the metal layer (20) have a watermark effect in which said marks (16) appear in a positive representation when viewed in transmitted light while appearing in a negative representation when viewed in incident light.
