Abstract (en)

[origin: WO2005074087A1] The invention relates to an electric installation unit comprising at least one socket that consists of at least one upper section (2) and a lower section (4) and a remote-controlled switching and/or regulating module (7). The aim of the invention is to simplify the installation and the adaptation of said unit to the design of the electric installation range. To achieve this, a common cover or supporting frame (1) is provided in order to position the flush socket (2, 4) next to the switching and/or regulating module (7) in a flush-mounting socket (8).
