Abstract (en)

[origin: WO2005077797A2] The invention relates to a method for storing rolls of prepared and unprepared material of a web-processing machine in a warehouse. According to said method, information that is used to anticipate consumption data for an impending production period or anticipated consumption data is supplied to a material flow system comprising implemented logic and a warehousing strategy is defined in a sub-process using the anticipated consumption data and the current inventory.
