Abstract (en)

[origin: WO2006045983A1] The method for the interception of redirection requests consists of the following: a stage (E10) wherein an HTTP response to a user station is received; a stage (E30) wherein a redirection address contained in said response is obtained; a stage in which a substitution request is created (E40) and sent (E50) to said redirection address; a stage (E60) wherein the response to this substitution request is received; and a stage (70) in which said response is transmitted to the user station.
