Abstract (en)

[origin: WO2007093467A1] The invention relates to a cleaning device for a component (16), which is arranged within a process air circuit, of a household tumble dryer, in particular, for a heat exchanger, comprising a cleaning brush (32), which can be displaced along the component (16, 66) by means of a drive train (28) of a drive mechanism (30). Said drive train (28) of the cleaning brush (32) can be displaced along a guiding element (38) of the drive mechanism (30) and said drive mechanism (30) is protected against fluff or similar dirt by at least two flexible sealing elements (56, 58), between which the drive train (28) is passed through and is to be guided along the guiding element (38).
