Abstract (en)

[origin: WO2009006653A1] The invention relates to an apparatus for the treatment of a fibre composition with a treatment fluid composed of a distribution device for the treatment fluid with at least one pressure chamber, and also with a fibre transport device for the fibre composition, which is permeable to the treatment fluid. The invention further provides a method for the treatment of a fibre composition on a fibre transport device with a treatment fluid, where the treatment fluid is forced by superatmospheric pressure into the fibre composition.
