Abstract (en)

[origin: EP2570733A1] The arrangement (1) has a support element (2), which is fixed to the ceiling. A holding element, which is formed as a frame (7), is arranged between the support element and a chimney housing (6) for pre-assembly of the chimney housing. The chimney housing is held on the holding element and is movable from a lower pre-assembly position into an upper end position. The chimney housing is locked in the upper end position on the support element for forming a shadow gap (8) between the chimney housing and the ceiling surface (9).
