Abstract (en)
[origin: EP0002381A1] Apparatus for locking a closure such as a window comprising a member adapted to be mounted on the closure or a frame therefor and a handle pivotably mounted on the member for turning between two end positions for respectively locking and unlocking the closure, characterised by a lock (8) having a catch part or bolt (12) for cooperating with the member (2) so as to prevent turning movement of the handle relative to the member (2) in one of the two end positions when the bolt (12) is actuated to lock the apparatus.
