Abstract (en)

[origin: WO2015032371A1] The invention relates to a guide system (1) for arrangement in a vehicle seat backrest, which is designed for insertion of the guide rod (3) of a headrest (2). The guide system (1) comprises a sleeve (4), a ring (5) and an unlocking member (6). The guide sleeve (4), which can be fastened in the vehicle seat backrest, has an elongate opening (8), which is formed around the longitudinal axis of the sleeve (4) and is adapted for insertion of the guide rod (3) of the headrest (2). The ring (5) has a receptacle (10) and an upper opening (20), which is formed in the axis of the sleeve (4) and is aligned with the elongate opening (8) of the sleeve (4). The unlocking member (6) comprises a first locking block (11), which is arranged in the receptacle (10) of the ring (5) and has a first window (12). A radial opening (9), which runs transversely to the longitudinal axis of the sleeve (4) of the guide system (1), is formed on the outer face of the sleeve (4). The ring (5) comprises a lateral part (17), which has a perforation (18) aligned with the radial opening (9) of the sleeve (4). The radial opening (9) of the sleeve (4) and the perforation (18) of the lateral part (17) are formed in the same axis and designed for insertion of the guide rod (3) of the headrest (2). The unlocking member (6) comprises a second locking block (13), which has a second window (14), which is formed in the axis of the radial opening (9) of the guide system (1) and is designed for insertion of the guide rod (3) of the headrest (2).
