Abstract (en)

[origin: US4220660A] The invention is related to a process for the treatment of humans suffering from undesired urotoxic side effects caused by cytostatically active alkylating agents administered to them against malign tumors, comprising administering a pharmacologically acceptable salt of a mercapto alkane sulfonic acid having the general formula HS-alk-SO<sub>3</sub> to the human treated with the cytostatically active alkylating agent, in an amount ranging from 20% of the weight of the alkylating agent to the highest tolerated dosage of the salt of the mercapto alkane sulfonic acid, simultaneously or separately in combination with the alkylating agent.

Abstract (de)

Die Erfindung betrifft die neuartige Verwendung von pharmakologisch annehmbaren Salzen von Mercaptoalkansulfonsäuren der allgemeinen Formel HS-alk-SO<sub>3</sub>H bei der cytostatischen Therapie mit Alkylantien mit dem überraschenden Ergebnis, daß die durch Alkylantien verursachten starken Reizungen von Nieren, Harnwegen und Blase, die oft einen Abbruch der cytostatischen Therapie notwendig machen, nicht mehr auftreten.
