Abstract (en)

A digging and breaking apparatus including a bucket for a digging operation, a breaker for a breaking operation, an arm, an adapter rotatably mounted on the arm, and a drive unit for rotating the adapter. The digging and breaking apparatus is characterized in that the bucket and the breaker are mounted on the adapter; also in that the angle between the arm and the breaker is adjustable by rotating the adapter during the breaking operation; and in that the breaker and the bucket are so positioned with respect to each other that the breaking operation is performed by the breaker without detaching the bucket from the adapter. <IMAGE>
